Borrow Digital Magazines from Library

Tips to Using OverDrive's Libby App

Access borrowed magazines in your **shelf** under **loans**

Magazines download via wifi due to large size of files. Downloading is paused while you have a cellular internet connection. If wifi is not available, you have the option to stream when online.

 Magazines have fixed-layouts; layout & font can't be changed; use **Zoom** icon to adjust zoom level by pinching or clicking; click *done* to exit zoom mode

 Use **display** buttons to switch between one-page & two-page display on larger screens & landscape orientation; tap screen's center to show **display**

 **Menu** shows by tapping screen's center and provides quick access to: chapters (table of contents), history & bookmarks

 Turn pages by tapping or clicking on right or left edge of page

 Is Libby not behaving? UGH! Update Libby app from app store. If an update doesn't help, shut down device completely and restart. Also, if the app says, "You appear to have reached your loans limit for this card," select, **attempt to borrow anyway**. LOL!
